## Introduction

**Morse Code Cubes** are 3x3x3 Rubik's Cubes used to display the Morse code of *all* 26 International Alphabet letters and the Morse code of *all* 10 first numbers.

<p>(Letters) Morse Code Cube showing the code for 'A'</p>  A 3D perspective view of a 3x3x3 cube. The faces are labeled with letters and their Morse codes: Front face (A), Right face (E C -), Top face (T), Back face (B), Left face (D S Q A), and Bottom face (W J R Q O H P X Y M Z N L). The cube shows the internal structure with black lines and vertices. The letters are in yellow on blue faces, and the Morse code dots and dashes are in black on white faces.	<p>Letters Morse Code Cube – Letters</p>  A 3D perspective view of a 3x3x3 cube. The faces are labeled with letters and their Morse codes: Front face (A), Right face (E C -), Top face (T), Back face (B), Left face (D S Q A), and Bottom face (W J R Q O H P X Y M Z N L). The cube shows the internal structure with black lines and vertices. The letters are in yellow on blue faces, and the Morse code dots and dashes are in black on white faces.
<p>(Numbers) Morse Code Cube showing the code for '1'</p>  A 3D perspective view of a 3x3x3 cube. The faces are labeled with numbers and their Morse codes: Front face (1), Right face (2 2 4 4), Top face (2), Back face (3 3 0 1), Left face (9 8 1), and Bottom face (2 2 7 9 5 5). The cube shows the internal structure with black lines and vertices. The numbers are in yellow on blue faces, and the Morse code dots and dashes are in black on white faces.	<p>Numbers Morse Code Cube – Numbers</p>  A 3D perspective view of a 3x3x3 cube. The faces are labeled with numbers and their Morse codes: Front face (1), Right face (2 2 4 4), Top face (2), Back face (3 3 0 1), Left face (9 8 1), and Bottom face (2 2 7 9 5 5). The cube shows the internal structure with black lines and vertices. The numbers are in yellow on blue faces, and the Morse code dots and dashes are in black on white faces.

There are **Virtual Cubes** that can be *virtually* rotated and twisted on a computer screen and **Real Cubes** that can only be *physically* rotated and twisted by hand. A **Texture** is laid down on a Virtual Cube whereas real **Stickers** are stuck down on a Real Cube. A Morse Code Cube is designed by placing letters and numbers on a texture which is then laid down on a Virtual Cube (see <http://www.randelshofer.ch/> for more details).

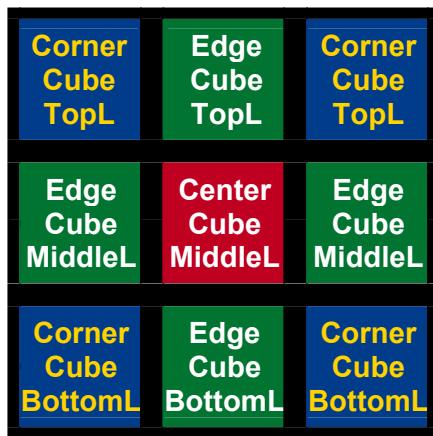

**Morse code** is a character encoding for transmitting telegraphic information, using standardized sequences of short and long elements to represent the letters, numerals, punctuation and special characters of a given message. The short and long elements can be formed by sounds, marks or pulses, in on off keying and are commonly known as "dots" and "dashes" or "dits" and "dahs" (see [http://en.wikipedia.org/wiki/Morse\\_code](http://en.wikipedia.org/wiki/Morse_code)).

The Morse code of *any* alphabet letter can be displayed on a *selected* Cube face by rotating and twisting some parts of the Cube. Similarly, the Morse code of *any* of all 10 first numbers can also be displayed on a companion cube. When this has been achieved, we say that the Cube has been *solved*.

Designing a Morse Code Cube that *works* is definitely not a trivial task but **Design Rules** exist that should be applied. Because it is nearly impossible to test all configurations, the placement of numbers and letters on a texture should be carefully checked at *the end* of the design process. This is carried out by applying a **Design Rules Check (DRC)** in the final design stage.

# Terminology

In a 3x3x3 **Rubik's Cube**, there are 8 **Corner Cubes**, 12 **Edge Cubes**, 6 **Center Cubes** and 6 **Cube Faces**. There are also 4 Corner Cube faces, 4 Edge Cube faces and 1 Center Cube face per **Cube Face**, as shown below.

There are 1 face per Center Cube, 2 faces per Edge Cube and 3 faces per Corner Cube.

There are also 3 horizontal *Layers* called *Top*, *Middle* and *Bottom Layers*.

Cube Lexicon		
English	Français	Deutsch
Cube	Cube	Würfel
cubie, cube	cube, petit cube	Würfelteil, Teil des Würfels
face	face	Seite, Seitenfläche
front face	face avant	vordere Seite, vorne
back face	face arrière	hintere Seite, hinten
left face	face gauche	linke Seite, links
right face	face droite	rechte Seite, rechts
top face	face supérieure	obere Seite, oben
bottom face	face inférieure	untere Seite, unten
sticker	étiquette (autocollante), plaquette	Kleber, Farbkleber
tile	tuile, plaquette	Plättchen, Farbplättchen
center cube, center	cube central, centre	Mittelwürfel, Mittelstein, Mitte
edge cube, edge	cube-arête, arête	Kantenwürfel, Kantenstein, Kante
corner cube, corner	cube de coin, coin	Eckwürfel, Eckstein, Ecke
layer	couronne	Schicht, Scheibe
top layer	couronne supérieure	obere Schicht, obere Scheibe
middle layer	couronne intermédiaire	mittlere Schicht, mittlere Scheibe, Mittelschicht, Mittelscheibe
bottom layer	couronne inférieure	untere Schicht, untere Scheibe
orientation, direction	orientation	Orientierung
to solve	résoudre	lösen, zusammen drehen
to twist	pivoter	drehen
to rotate	tourner, effectuer une rotation	drehen
clockwise	dans le sens horaire	im Uhrzeigersinn
anticlockwise, counter-clockwise	dans le sens anti-horaire	im Gegenuhrzeigersinn

## Letters Morse Code Cube Layout

There are 26 letters in the International Alphabet and only 24 faces on the 8 corner cubes of a 3x3x3 Cube. So, letters have to be distributed *both* on corner and edge cubes.

### En Bloc Layout Design

In this *particular* design, the left-hand side column is used for displaying letters either on a **Top Left (TL)** corner cube or on a **Middle Left (ML)** edge cube. Morse Code symbols can then be displayed on one of two 4-faces *blocks*:

- 1- Block 1: symbols on **Top Center**, **Top Right**, **Middle Center**, **Middle Right**
- 2- Block 2: symbols on **Middle Center**, **Middle Left**, **Bottom Center**, **Bottom Right**

Alphabet letters are encoded as sequences which are composed of 1, 2, 3 or 4 symbols. Note that a sequence *never* begins with a 'white'. Then, a sequence is just a block of 4 symbols (symbol1,symbol2,symbol3,symbol4), arranged in a 2x2 table in order to be laid on a Cube Face. A block can then be **moved up or down** on a Cube Front Face.

En Bloc Symbols Layout	
Symbol1 (•,—)	Symbol2 (•,—,white)
Symbol3 (•,—,white)	Symbol4 (•,—,white)

### Center Cubes Layout

There are only 2 symbols laid on 2 center cubes: '•' (dot) and '—' (dash) but there **must** be a 'white" center cube.

### Corner Cubes Layout

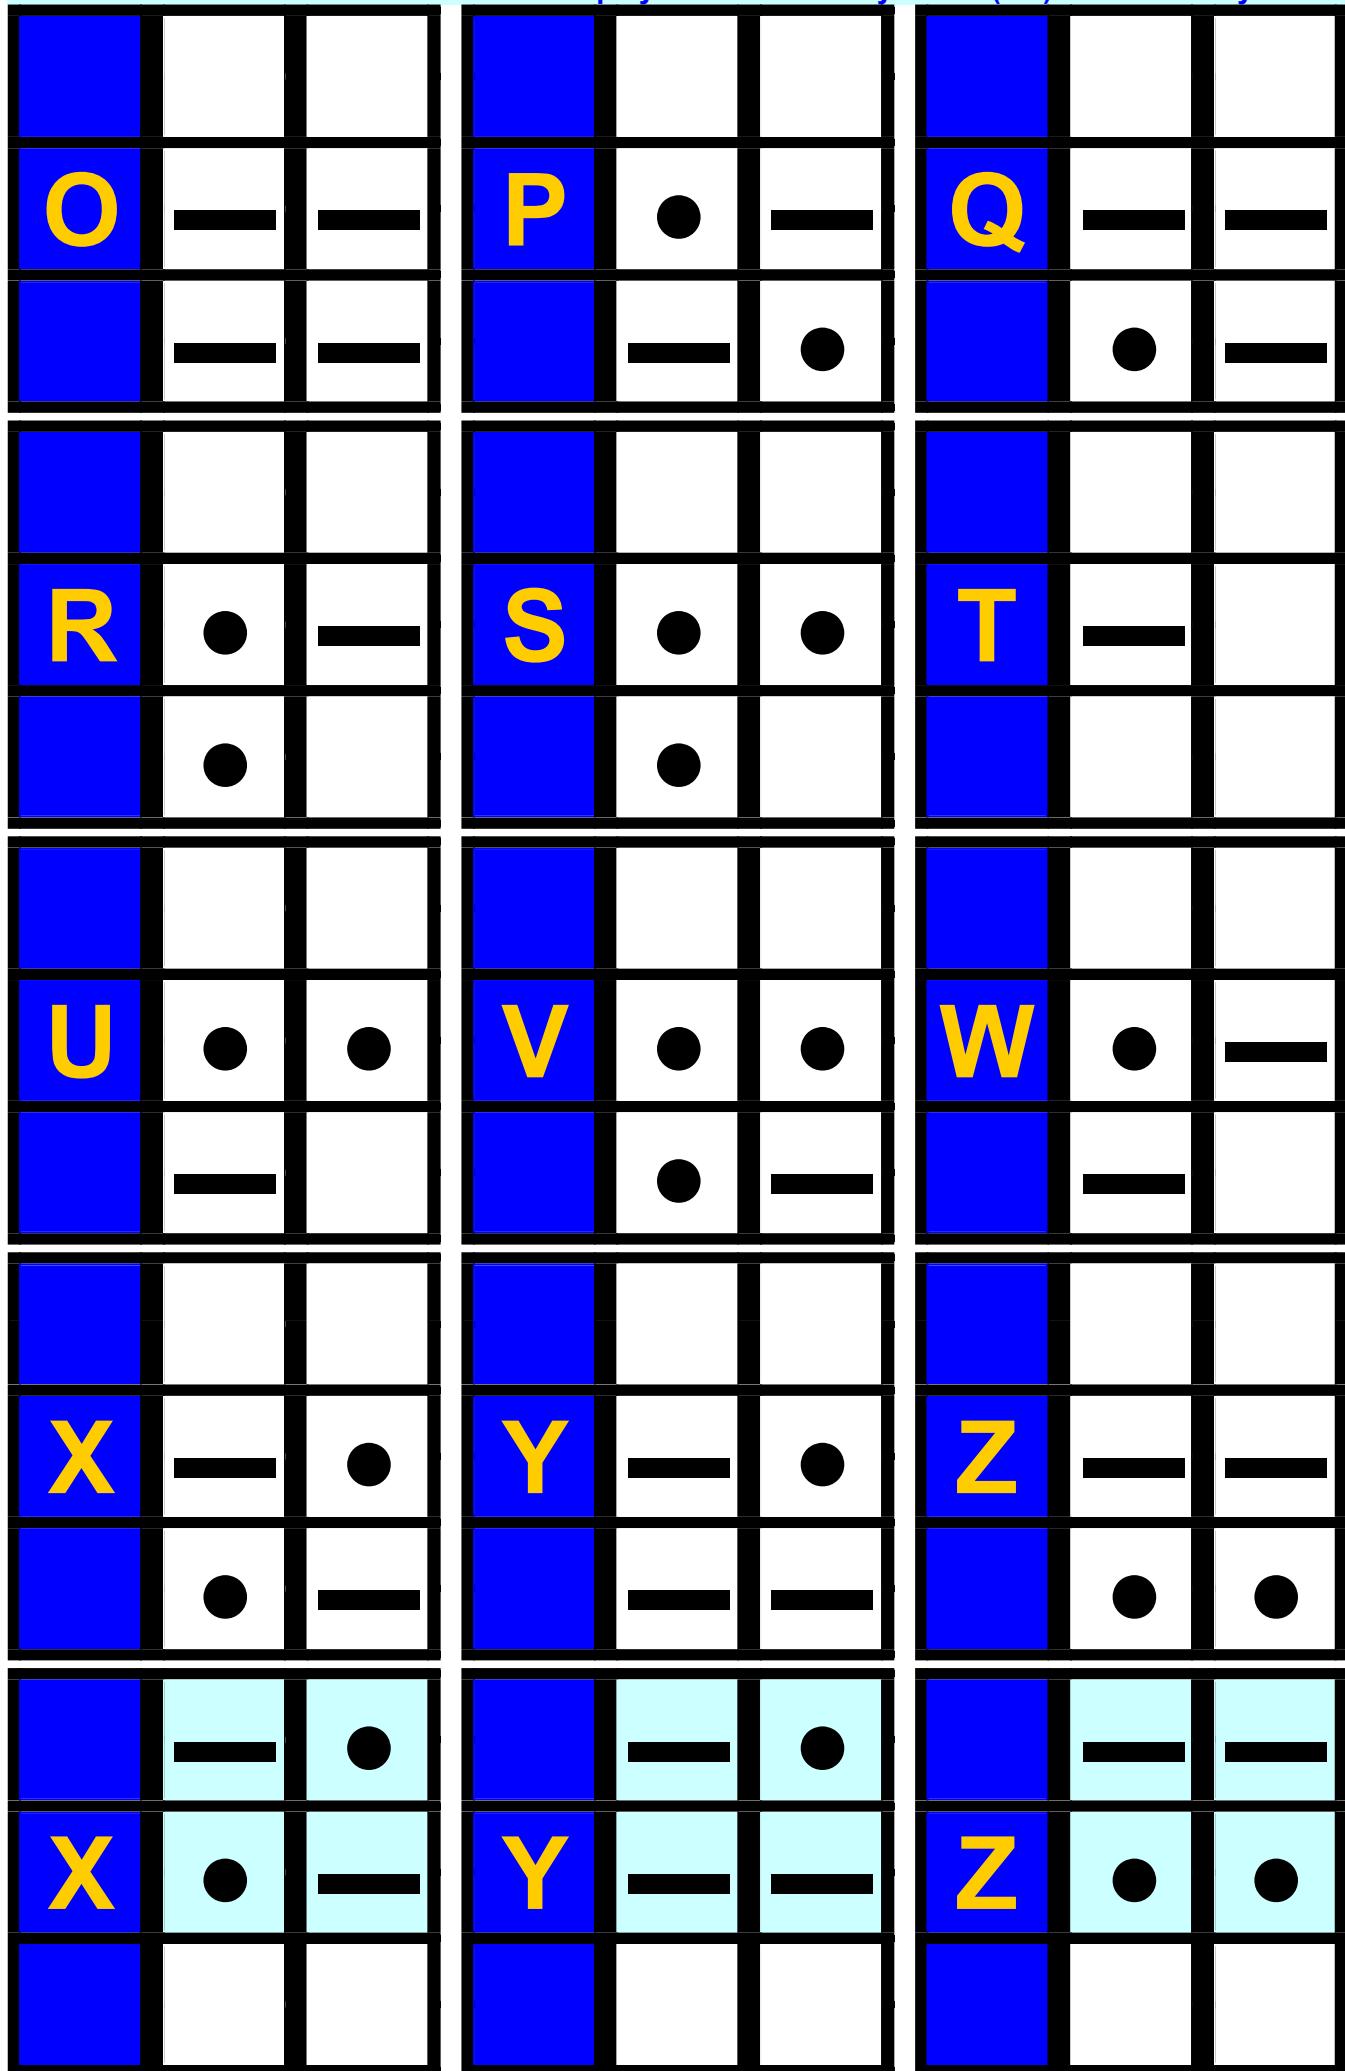

- 1- 5 corner cubes for 14 letters from A to N that are *logically* grouped and laid out **Top Left (TL)**:  
(A,B,C), (D,E,F), (G,H,I), (J,K,L), (M,N,white)
- 2- 1 corner cube for symbols:  
(•,—,white)
- 3- 1 corner cube with one **blue** face:  
(blue,white,white)
- 4- 1 corner cube with one **blue** face:  
(blue,white,white)

### Edge Cubes Layout

- 1- 6 edge cubes for the remaining 12 letters that are *logically* grouped and laid out **Middle Left (ML)**  
(O,P), (Q,R), (S,T), (U,V), (W,X), (Y,Z)
- 2- 4 edge cubes for symbols:  
(•,white), (•,white), (—,white), (—(90°),white)
- 3- 1 edge cube with one blue face:  
(blue,white)
- 4- 1 blank edge cube:  
(white,white)

<b>TL</b>	<b>TC</b>	<b>TR</b>	<b>A</b>	•	—	<b>B</b>	—	•

<b>L</b>	•	—	<b>M</b>	—	—	<b>N</b>	—	•
	•	•						

Morse Code for Letters from O to Z displayed on Middle Layer Left (ML) – *En Bloc* Layout

# Numbers Morse Code Cube Layout

There are 10 numbers that should be distributed on the cube. For maximizing *flexibility*, each of these 10 numbers *and* the associated Morse code can be displayed **En Bloc** with up to **4 configurations per number**. A block can be **moved up or down** on a Cube Front Face.

## En Bloc Layout Design

Numbers are encoded as sequences which are composed of 5 symbols. Then, a sequence is just a block of 5 symbols (symbol1,symbol2,symbol3,symbol4,symbol5) *plus* the number, arranged in a 2x3 table in order to be laid on a Cube Face.

En Bloc Symbols Layout					
Number on the Right			Number on the Left		
Number	Symbol1 (•,—)	Symbol2 (•,—)	Symbol1 (•,—)	Symbol2 (•,—)	Symbol3 (•,—)
Symbol3 (•,—)	Symbol4 (•,—)	Symbol5 (•,—)	Symbol4 (•,—)	Symbol5 (•,—)	Number

## Center Cubes Layout

There are only 2 symbols laid on 2 center cubes: '•' (dot) and '—' (dash).

## Corner Cubes Layout

- 1- 3 corner cubes for 10 numbers that are *logically* grouped and laid out **Top Left (TL)**:  
(0,1,2), (3,4,5), 9 (9 is a 6 from a **BR** corner)
- 2- 3 corner cubes for 10 numbers that are *logically* grouped and laid out **Bottom Right (BR)**:  
(1,2,3), (4,5,6), (7,8,white), 0 (0 is a 0 from a **TL** corner), 9 (9 is a 6 from a **TL** corner)
- 3- 2 corner cube for symbols:  
(•,—(**TL**),white), (•,—(**TR**),white)

## Edge Cubes Layout

- 1- 4 edge cubes for 10 numbers are *logically* grouped and laid out **Middle Left (ML)**  
(0,1), (2,3), (4,5), (6,7), 8\* (8 is an 8 from an **MR** edge), 9 (9 is a 6 from an **MR** edge)
- 2- 4 edge cubes for 10 numbers are *logically* grouped and laid out **Middle Right (MR)**  
(1,2), (3,4), (5,6), (7,8), 0 (0 is a 0 from an **ML** edge), 9 (9 is a 6 from an **ML** edge)
- 3- 3 edge cubes for symbols:  
(•,—(**ML/MR**)), (•,—(**ML/MR**)), (•,—(**TC/BC**))
- 4- 1 white edge cube  
(white,white)

\* An '8' is composed of 2 loops, the upper loop being usually smaller than the lower loop. If an '8' is to be used flipped over (ie. 180° rotated), it should be redrawn with both loops of the same dimensions.

## Solving a Letters Morse Code Cube Step by Step

In this example, a step by step solving process is applied to the Morse Code Cube, just described before. Note that we only need to solve a *single Face* out of six. We will solve a Face for letter 'C'.

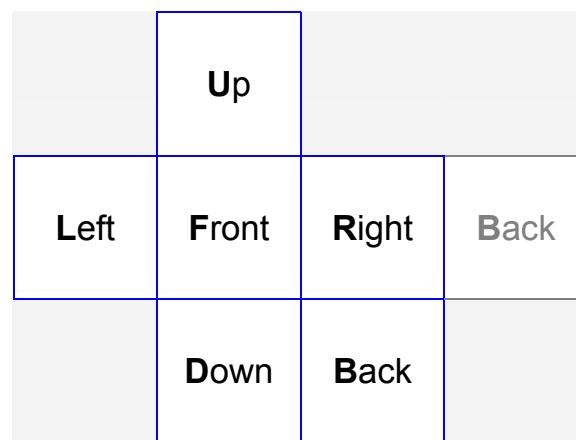

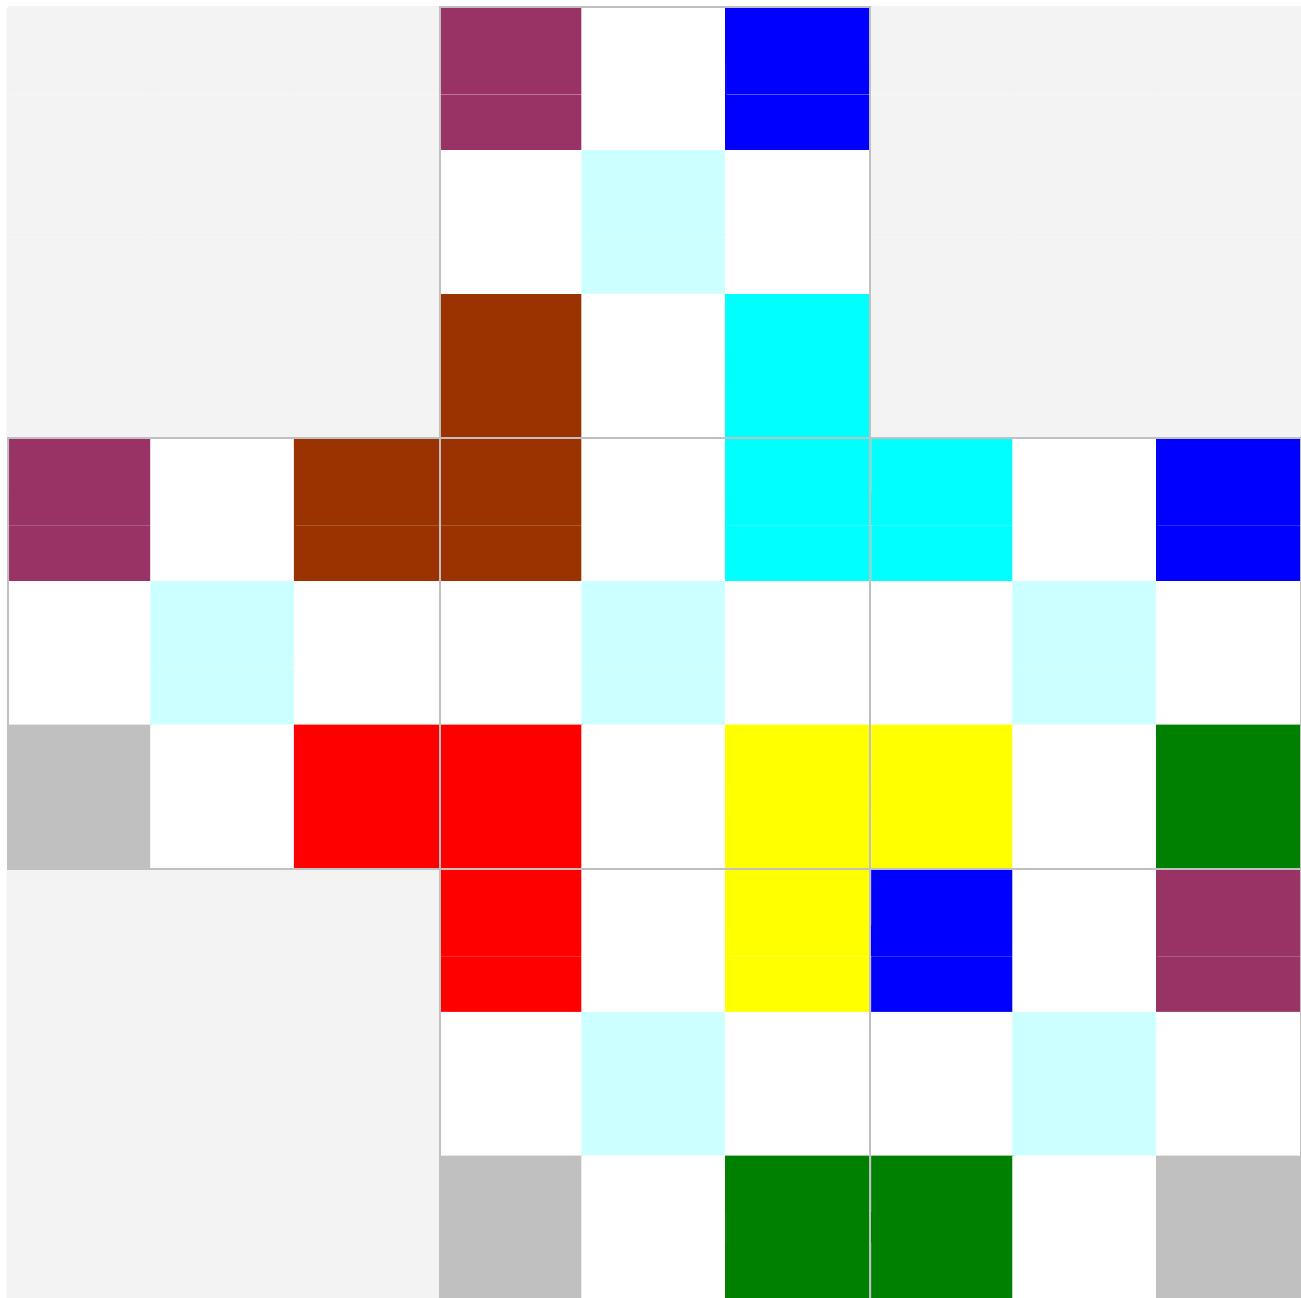

Print out this page and fill in the blank faces with *your* data. Then try to design your own Cube.

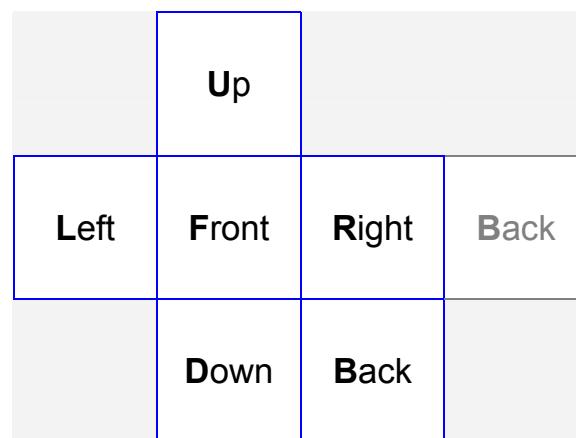

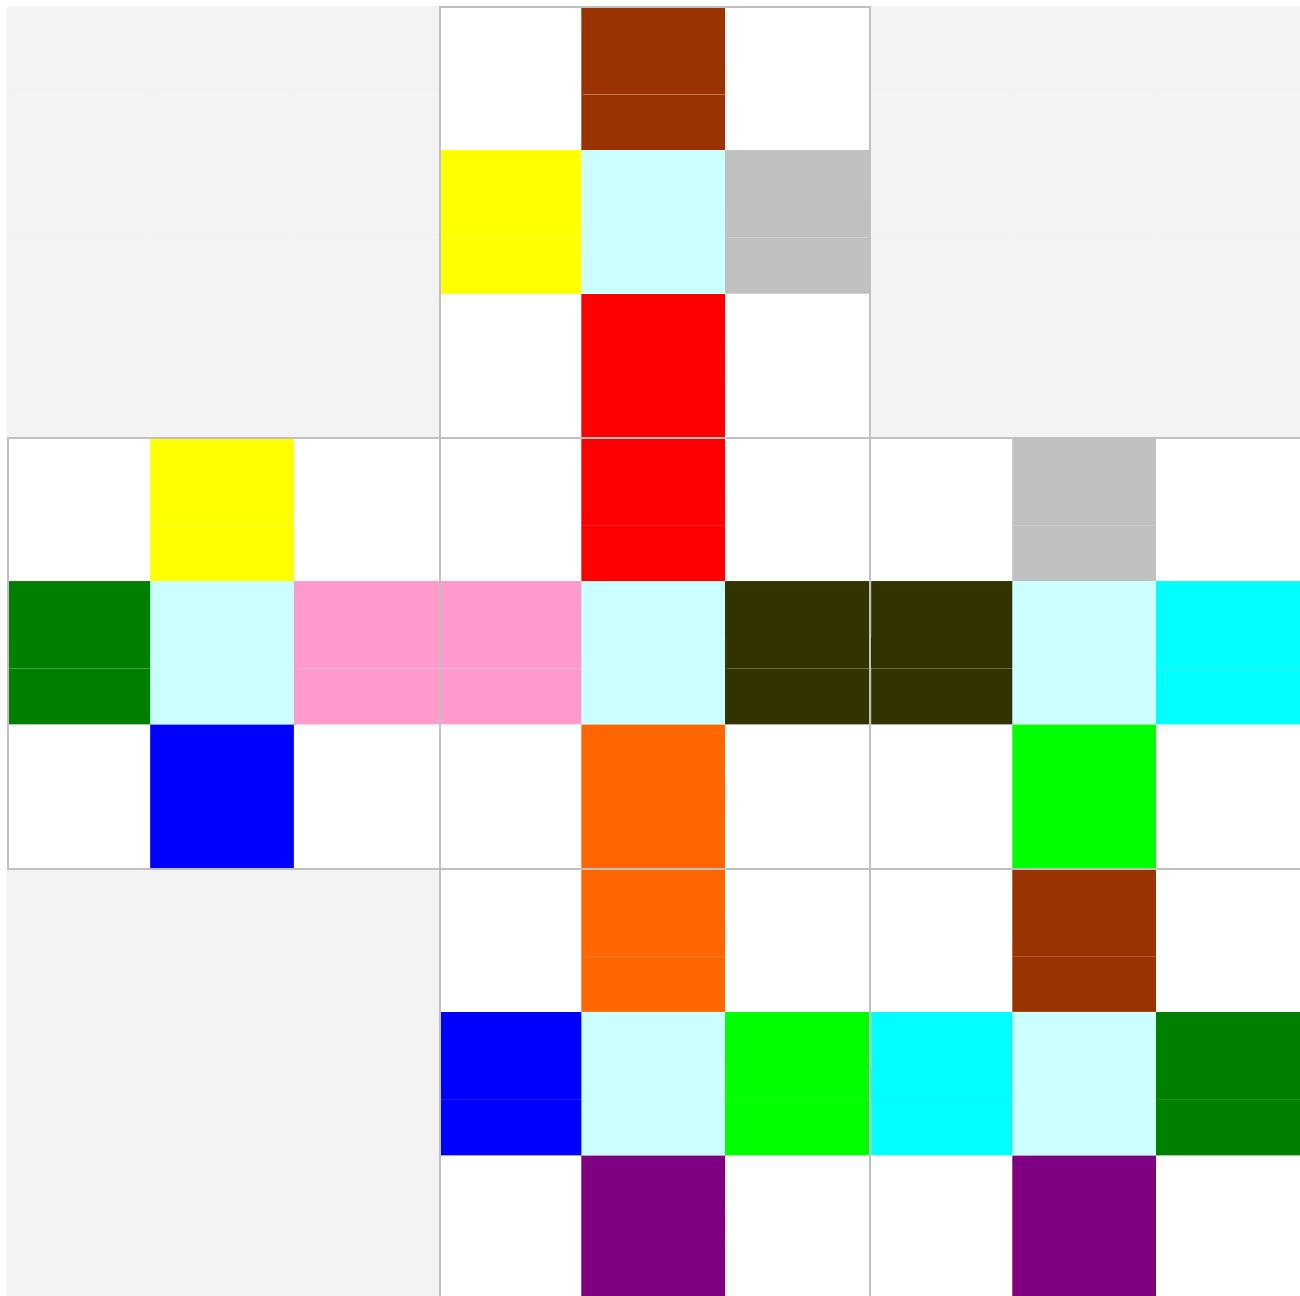

## Corner Cubes Final Check

There are 8 Corner Cubes and 3 faces per Corner Cube. In the diagram below, each Corner Cube is displayed in 8 different colors and with the same color applied to each of its 3 faces. This diagram can be used as a convenient *visual aid* to check Design Rules (DRC).

## Edge Cubes Final Check

There are 12 Edge Cubes and 2 faces per Edge Cube. In the diagram below, each Edge Cube is displayed in 12 different colors and with the same color applied to each of its 2 faces. This diagram can be used as a convenient visual aid to check Design Rules (DRC).

## Texture Template

This is a texture template that can be printed out and used for writing down numbers and letters by hand *prior to* texture design. All is needed are pencil, rubber...and time.
